DETAILED ACTION

Receipt of Papers

Receipt is acknowledged of the Request for Extension of Time, Request for Continued Examination, Prior Art with Attachment, and the Preliminary Amendment C, all received by the Office April 9, 2003.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 4-6 are provisionally rejected under the judicially created doctrine of double patenting over claims 1-4 of copending Application No. 09/913,284. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: The '284 application claims a method for the therapy of a symptom of urinary disturbance... by administering tamsulosin. This method is clearly generic to the

Art Unit: 1615

method claimed in the instant application, and therefore the method of the '284 patent encompasses the method instantly claimed.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. Appropriate action is respectfully requested.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 4 recites "[a] method of treating voiding dysfunction associated with neurogenic bladder, comprising administering tamsulosin or a pharmaceutically acceptable salt to a patient..." There are several problems with the scope of this claim. First, it is unclear what is meant by "associated with." Does the patient have to have neurogenic bladder? Need the person only have voiding dysfunction? Is voiding dysfunction always a symptom of neurogenic bladder? If not, does this method only apply when the patient has neurogenic bladder? This leads to the second issue. There is nothing in the claim as written which requires the patient to actually have neurogenic bladder. The claim, as written, requires only the administration of tamsulosin to a person who does not exhibit lower urinary tract obstruction. This patient could be completely healthy. To clarify this second issue, it is recommended that the claim be

Art Unit: 1615

amended to contain language similar to claim 5, stating, "to a patient with neurogenic bladder."

Clarification on each of these points is respectfully requested, and the claims should be amended to reflect this clarification.

Claim 6 is rejected for the same reasons discussed above.

Allowable Subject Matter

Claim 5 is allowed.
